

Questions and Answers

Below are questions received from potential Proposers:

Q1. If known, when is this project expected to go to bid for contractors and what is the expected start date for construction?

A1. The date for this project to go to bid for contractors and the expected start date for construction will be heavily influenced by the outcome/deliverable of this study.

Q2. Regarding the Super Node Relocation project SOQ, are only local to Wisconsin prime firms being considered or can the proposed project team consist of a local firm and out of state firm?

A2. Out of state, domestic, firms are eligible for this selection. The firm, or subconsultants, must have the appropriate Wisconsin licenses to fulfill the requirements of the project (for example, stamp the construction documents). Availability of in-person support during the project (especially Construction Administration) is a criterion in the selection process.
