

Booking Tool Tutorial: Find Direct Flight Options

Accessing real-time data from all of the GDSs, find all of the direct flight options for your trip in the tool by using the direct flight filter.

Put in your departure and arrival cities, preferred dates and times.

Prior to clicking the search button, click the blue arrows to the right of the Departure/Return times to open the direct flight filter.

The screenshot shows the flight search interface with the following details:

- Departure City:** MKE - General Mitchell Intl Arpt - Milwaukee, WI
- Arrival City:** DEN - Denver Intl Arpt - Denver, CO
- Departure Date:** 04/10/2015
- Departure Time:** depart (dropdown), Morning (dropdown), ± 3 (dropdown)
- Return Date:** 04/11/2015
- Return Time:** depart (dropdown), Morning (dropdown), ± 3 (dropdown)
- 24 hour range:** A grid showing flight availability from 12:00 am to 11:59 pm. The grid is divided into 24 columns, with green bars indicating available flight times.
- Direct Flight Filter:** Blue arrows (up and down) are located to the right of the departure and return time dropdowns, used to open the direct flight filter.

If there are direct flights available that fit your departure/arrival cities and dates of trip, a grid will display a 24 hour window with direct flight options available. You can adjust your preferred travel times to narrow in on direct flights before hitting the search button.

If no direct flights are available that match criteria a message will display stating so.
